Closing Thoughts:

You won't always have the answer, and that's okay.

Mastery isn't about knowing everything; it's about knowing where to look and who to learn from. The most successful entrepreneurs don't operate alone. They build networks of mentors, peers, and professionals who help fill in the gaps. Whether it's an accountant, a financial advisor, or a fellow contractor who's been in your shoes, remember that your resources are part of your success system. Stay curious, stay teachable, and stay connected, because wisdom grows fastest when it's shared.
